Comprehensive Identity Lifecycle & Access Management for Companies using ServiceNow

Achieve a greater state of compliance and strengthen application access security with a full-fledged Identity Lifecycle Management (ILM) and Governance solution from OneLogin and Clear Sky. Designed specifically for ServiceNow customers, this joint solution allows companies to define, manage, and automatically execute identity and application access policies. Companies can create customized workflows and approval requirements for all elements of the user lifecycle, from hire to termination, with a complete audit trail.

Identity Orchestration for Enhanced Security and Compliance

Better Security and Compliance

- Define, structure, and automate identity workflows and policies.
- User profile changes in Clear Sky are immediately reflected in OneLogin for quick and accurate authentication action.
- Integrations with Security Operations and GRC

Decreased IT & Security Costs

- Eliminate time-consuming security audits with documented remediation or acceptance of risk and corresponding authentication action.
- Reduce likelihood of expensive data breach due to manual error or access security gaps.
- Save time when you initiate workflows directly within the ServiceNow platform.

OneLogin is Trusted by 2000+ Customers Worldwide

THE CARLYLE GROUP

CONDÉ NAST

Herman Miller

Available via the ServiceNow Store and native to the ServiceNow platform, Clear Sky's Identity Lifecycle Management solution enables enterprises with complete visibility into user identity and application access.

OneLogin's Identity and Access Management solution allows organizations to secure employee, customer, and partner access to 1000s of applications use a scalable and easy-to-use solution for both admins and end users.

Create & Execute Approval Workflows

Easily configure "out of box" approvals or create custom workflows to review and certify application access, all within the ServiceNow platform.

Authenticate & Grant Application Access

Automatically grant and revoke access to applications using OneLogin's real-time directory connectors and SAML 2.0 for secure single sign-on based on governance policies defined in Clear Sky.

Audit the Employee Lifecycle

Streamline the management of on/off boarding workflows including secondary accounts, app permissions, group membership changes, and more to ensure only the right people are authorized to access the right applications and data.

Detect & Respond To High-Risk Logins

OneLogin's adaptive authentication uses machine learning to prompt users for multi-factor authentication (MFA) if it detects high-risk based on network, device, time, geography, and individual end-user behavior.
