Streamlining User Management Workflows Between IT and HR

Implement an HR-driven identity strategy to simplify employee on- and off-boarding workflows jointly managed by HR and IT. Put an end to time-consuming, manual entry of user data between BambooHR, other applications, and IT-driven user directories like Active Directory (AD).

With OneLogin and BambooHR, consolidate to one primary system of record for user data across all your cloud and on-premises applications. If AD, LDAP, or Google Directory must remain your primary system of record, leverage OneLogin's best-in-class directory connectors to delegate authentication and grant, modify, or revoke user access to BambooHR and other applications based on their directory attributes.

Password Reset

Strengthen Your Identity Strategy With These Benefits

Protect Access to BambooHR and All Apps

BambooHR hosts some of your organization's most sensitive data - employee data. Secure access and improve user adoption by allowing employees to use their master credentials to log into BambooHR and all their corporate SaaS applications.

Decrease IT Operations and Support Costs

Free up IT time and resources with built-in self service password reset and automated user account provisioning and deprovisioning. Spend time and money focused other IT initiatives.

Customize Security Controls

Create and enforce customized security policies such as multi-factor authentication, password complexity, session timeout, and more. Easily map those policies based on user attributes or other identifiers such as IP address.

Reduce Complexity of Integration Projects

Leverage OneLogin's pre-built integrations with BambooHR and all your applications to accelerate rollout projects.

"Enabling BambooHR as our source of truth, with OneLogin, allows us to align critical IT and HR processes and better leverage both platforms. Our enhanced integration looks at HR data in BambooHR to auto-initiate employee onboarding and offboarding tasks, such as configuring accounts and updating access permissions across business applications. The end result is a secure, streamlined process and massive time savings for both teams."

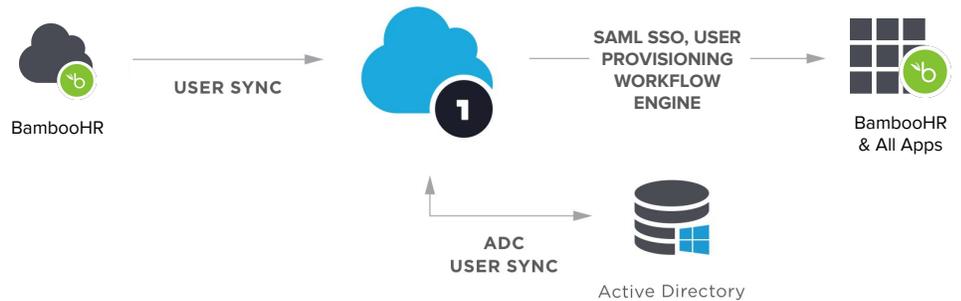

KEVIN VYE, AVP IT and Security for Auvik Networks

Choose Your Preferred Identity Strategy

STRATEGY 1:

HR-Driven Identity Management

Unify HR and IT user provisioning and management workflows by enabling BambooHR to be your primary system of record and synchronizing user information from BambooHR across all your corporate systems, including Active Directory.

STRATEGY 2:

IT-Driven Identity Integration

OneLogin's best-in-class directory connectors can integrate BambooHR with multiple user stores, including Active Directory, LDAP, Google and more in real-time. Integrate in as few as 60 minutes, depending on your environment.
