Strengthen Your Identity Strategy With These Benefits

Protect Access to All Apps with Passwordless MFA

HYPR makes login lightning-fast and easy across your organization. Secure access and accelerate user adoption by allowing employees to use their smartphone and other FIDO-based authentication for login into their desktops and all their corporate SaaS applications.

Eliminate Deployment Complexity

Leverage OneLogin's pre-built HYPR integration and powerful mappings and rules engine to automate the True Passwordless MFA deployment process. Spend less time on manual entry and more time on other IT initiatives.

Decrease IT Operations and Support Costs

Free up IT time and resources with built-in self-service account recovery and automated user provisioning and deprovisioning based on user's directory attributes or security groups originating from your corporate directory.

Customize Security Controls

Create and enforce customized security policies such as passwordless multi-factor authentication, session timeout, and more. Easily map those policies based on user attributes or other identifiers such as IP address.

Advanced Security and Scalability

Rest easy with redundant data centers in the US and Europe, massive scalable infrastructure, quarterly security reviews by iSEC partners, and 24/7 monitoring. 99.9% Uptime Guarantee.

Reduce the Attack Surface

Eliminate passwords and reduce ATO fraud by up to 99%. True Passwordless MFA protects your employees against account compromise, phishing, MITM attacks, and other password-based threats – even when they're offline.

Over 2,000 enterprise customers globally secure their applications with OneLogin

Integrates with Your Existing Directory Infrastructure

OneLogin acts as a secure, virtual directory in the cloud, allowing you to easily synchronize users across any number of directories, including Active Directory (AD), LDAP, Google Apps directory, OneLogin cloud directory, and HR directories. Import user attributes and pass them on to downstream applications via SAML or API-based provisioning. Together, OneLogin and HYPR provide the highest level of assurance and the best user experience from desktops to cloud apps and other corporate resources.
