Read the following description of the state of business in 2025 and then rate your level of confidence in the prediction.

Questions for the Study

A CIO Survey of Business

The Dynamic Future

The volume, complexity, and pace of business are undeniably increasing. This survey of 100 global CIOs delivers fresh implications for technology leaders and users alike.

The workforce of the future will have both human and digital resources (e.g. bots, AI). By 2025, how will digital resources (e.g. bots, AI) contribute to your business relative to human resources?

For your business, how will the number of business apps in production differ by 2025?

For your business, what will the workforce look like by 2025? (check one box per row)

There will be a significant increase in the automation of work / work-related processes by 2025. E.g. Spin up toy production, ship the toy, and shut down the production line.

High-performing businesses of the future will have to be able to leverage machine learning and AI to predict and rapidly meet the needs of their customers. E.g. Spin up toy production, ship the toy, and shut down the production line.

By 2025, Dynamic Marketplaces may arise where a human and digital workforce using an increasingly complex technology stack will conduct business in a blend of physical and virtual workplaces worldwide.

The workplace of the future is widely dispersed across many geographies and timezones.

There will be a significant increase in the automation of work / work-related processes by 2025. E.g. Spin up toy production, ship the toy, and shut down the production line.

High-performing businesses of the future will have to be able to leverage machine learning and AI to predict and rapidly meet the needs of their customers. E.g. Spin up toy production, ship the toy, and shut down the production line.

Dynamic Marketplaces may arise where a human and digital workforce using an increasingly complex technology stack will conduct business in a blend of physical and virtual workplaces worldwide.

For your business, how will the remote workforce differ in 2025?

For your entire business, how will the number of business apps in production differ by 2025?

There will be a significant increase in the automation of work / work-related processes by 2025. E.g. Spin up toy production, ship the toy, and shut down the production line.

High-performing businesses of the future will have to be able to leverage machine learning and AI to predict and rapidly meet the needs of their customers. E.g. Spin up toy production, ship the toy, and shut down the production line.
