

How CIAM Protects Your Customer Needs

A Customer Identity & Access Management (CIAM) solution automates the login and authentication process, so you can focus on what happens *after* a customer logs into an app. It ensures that your customers' identities are secure and gives you options to design the customer experience to fit your needs.

YOUR CUSTOMERS:

CIAM Solution

Easy to Register

CIAM solutions should give customers a fully branded, easy to follow registration process

Simple & Secure Login

CIAM solutions should ensure that customers are logging in **simply and securely** way and should give you choices in how to secure their login:

- Multiple MFA options
- Adaptive authentication
- A passwordless login flow
- Social login
- Compromised credential check
- API authentication

Scalability

CIAM solutions should scale automatically to meet your Customer needs

1

Seamless Migration

OneLogin consolidates customer identities across different identity stores without interrupting the end user experience.

YOUR COMPANY APPLICATIONS:
