Secure Access To ServiceNow Capabilities On Any Device
On And Off-Premise

Protect key systems and data from unauthorized access with real-time identity and access management and single sign-on (SSO) from OneLogin. OneLogin is a critical component of a comprehensive security solution, combining industry-leading technology and ease of use for on-premise and cloud-based applications.

With OneLogin for ServiceNow, you can:

- Secure access to ServiceNow capabilities on any device on and off-premise
- Centralize and streamline access with SSO across cloud, web, and on-premise portfolios
- Unify identity orchestration across 1000s of applications within the ServiceNow platform
- Easily import ServiceNow role/entitlement definitions to set user access privileges

PRODUCT HIGHLIGHTS

- SSO for Cloud/Web, Mobile, On-premise, and Desktop
- Multi-Factor, Enterprise-grade Authentication
- Unified Directory (OneLogin, AD, LDAP, Google)
- Simplified, Secure Remote/VPN Support
- Real-Time, Automated On- and Off-Boarding and Self-Service Password Reset
- 5,000+ Pre-Integrated Apps
- 850+ Applications Supporting SAML SSO
- HR-Compatible Identity Integration
- Federated Search
- Best in Class, Icon Driven User Interface
- Automated Access and Usage Reporting
- Secure LDAP/RADIUS for User Authentication and Authorization

Ensure Consistent Authentication

Reduce threats and develop and enforce consistent user and application security policies, including 2FA, password length and complexity, IP address restrictions, and more...

Decrease It Operations And Support Costs

Reduce demand for IT services with self-service password recovery and reset and automated user provisioning and de-provisioning. Leverage OneLogin's extensive catalog of pre-built application integrations vs. building and maintaining custom integrations in house.

Unify Multiple Directories

OneLogin interoperates seamlessly with Active Directory, Workday, LDAP, and Google Apps, providing a unified cloud directory to enable secure user access independent of location.

Centralize Control, Reporting and Compliance

Unify multiple, diverse user directories and track access across multiple, diverse systems and applications. Automate audit trails and compliance reporting.

Secure Access Across Cloud And On-Premise Apps

Secure mobile and on-site access using a single set of log-in credentials. Eliminate the need to track multiple passwords, improve satisfaction and productivity, and streamline provisioning.

Automate User On/Off-Boarding In Real Time

Create, delete, and modify user accounts to reduce the risk of security breaches and unauthorized access. Ensure all users (internal and external) have real-time, secure access to their applications needed for their defined roles.

LEVERAGE EXISTING DIRECTORY INFRASTRUCTURE

OneLogin acts as a secure, virtual directory in the cloud, allowing you to easily synchronize users across any number of directories, including Active Directory (real time), LDAP, Google Apps directory, OneLogin cloud directory, and HR directories. Import custom user attributes and pass them on to downstream applications via SAML or API-based provisioning.

TRUSTED BY 2000+ OF THE WORLD'S MOST INNOVATIVE COMPANIES

“ With OneLogin, I felt like I would be getting a true partner. The team was more informative in terms of the technology as it applied to our needs.

NIRAV SHAH | Director of Information Systems

“ Our research showed OneLogin to be the best fit for our needs in the IAM space. The OneLogin team has been very responsive and supportive during our deployment and beyond.

JOHN SCHMEIDER | IT Project Leader
